EDITORS

PROF. C. W. CORRENS, *Sedimentpetrographisches Institut der Universität, Lotzestr. 13, Göttingen, British Zone, Germany.*

DR. E. INGERSON, *United States Department of the Interior, U.S. Geological Survey, Washington 25, D.C., U.S.A.*

DR. S. R. NOCKOLDS, *Department of Mineralogy and Petrology, The University, Cambridge, England.*

PROF. F. A. PANETH, F.R.S., *Londonderry Laboratory for Radiochemistry, The University, South Road, Durham, England.*

PROF. L. R. WAGER, F.R.S., *Department of Geology and Mineralogy, The University, Oxford, England.*

PROF. F. E. WICKMAN, *Naturhistoriska Riksmuseets, Mineralogiska Avdelning, Stockholm 50, Sweden.*

I. General

1. Papers on Geochemistry should be submitted to the editors for the appropriate country or language (*Papers on Cosmochemistry should be sent to Prof. F. A. Paneth, F.R.S.*). Papers submitted for publication will naturally be judged from the standpoint of scientific originality and novelty. Technical details of apparatus used in scientific investigation can, however, be presented in brief notes. The preparation of progress reports and review articles will be invited by the Editors from time to time and it is therefore requested that no uninvited contributions of this nature be submitted. The Journal will appear as independent and complete numbers, which will be sold separately and combined into volumes of about 300 pages.

2. Only papers which have not been previously published will be accepted. The publishers retain exclusive publication rights for all papers in all languages and countries, on acceptance and until the 31st December of the year following the year when the printed paper appears. Authors must agree not to publish elsewhere a paper submitted to and accepted by *Geochimica et Cosmochimica Acta.*

3. Authors will receive 75 free reprints of their papers. Additional copies can be purchased if ordered at the time the first proofs are returned.

II. Manuscript Requirements

1. The manuscript must be written in one of the three official languages, English, French, or German.

2. The manuscript should be an original typewritten copy (not a carbon). The text must be ready for printing and should be carefully checked for errors. Authors will receive proofs for correction.

3. Half-tone illustrations are to be restricted to the minimum necessary. They must accompany the manuscript mounted on separate sheets. Line drawings may be redrawn for the sake of uniformity and should therefore include all relevant details. Photographs should be enlarged sufficiently to permit their clear reproduction in half-tone. If words or numbers appear in photographs, two copies are requested, one clearly printed and the other without inscription. All illustrations and tables should be provided with descriptive legends.

4. Only such references to literature should be given as are referred to in the text. Literature references are to be numbered and listed together at the end of the manuscript and not as footnotes. All references should include the standard (according to the *World List of Scientific Periodicals*) abbreviated title of the journal, year, volume number, and first and last page numbers.

5. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper should be briefly recapitulated in an abstract in English. Such an abstract may, however, be submitted by the author in the language of the original typescript for translation into English by the editorial staff.

6. To conserve space authors are requested to mark less important portions of the paper (such as description of methods, record of experimental results, *etc.*) for printing in smaller type.
